DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1- are rejected under 35 U.S.C. 102(e) as being anticipated by Wildfeuer et al. (US 6,829,244 B1, hereinafter "Wildfeuer").

Regarding claim 1, Wildfeuer discloses a data communication apparatus (Figures 1 and 2) comprising:

a memory (memory 204 of jitter buffer 114a);

a data processor (PCM controller 112a);

a controller (packet network controller 120a).

Regarding claim 2, packet network controller 120a comprises codec 202 and modem 102a.

Regarding claim 3, note clock source 118a.

Regarding claims 4-5, jitter buffer control logic 300 determines if there is a memory overflow condition and, if so, enables reading from the memory with the value of the playout delay register equal to the value of the delay-max register (Figure 4; col. 8, lines 45-52).

Art Unit: 2614

Regarding claim 6, jitter buffer control logic 300 determines if there is a memory underflow condition and, if so, fills the memory by disabling reads from the memory (col. 8, lines 35-44).

Regarding claim 7, the data stored in the voice packet can be facsimile data (col. 5, lines 9-21; col. 11, lines 27-28).

Method claims 8-10 recites steps which are carried out by the system of Wildfeuer as described above.
